

# CLF Sustainability WG

- [Vision and Roadmap for Sustainable Composites](#) (Jan 2019)
- NCC developing capability in LCA – international collaboration to develop CF data
- Carbon fibre recycling commercially active through [ELG Carbon Fibre](#) – need to increase applications for rCF
- [FRP Circular Economy Study](#) (Sept 2018) directs how to manage waste – investigating cement kiln
- HVMC Large Transformational Project (LTP) ReDisCovER on circular economy
- Working with EuCIA (+CEFIC, WindEurope, etc) on recycling message, data, etc.
- Supporting bio-based materials through KTN Materials for Composites SIG and other routes
