

## MEMBERSHIP REFERRAL SCHEME

The UK composites industry is a close knit community and we are honoured to have members who are proud to be a part of the Association.

That's why we introduced the **Membership Referral Scheme** - as a thank you to those who recommend us to other companies within their supply chain.

### HOW IT WORKS

If a company joins Composites UK after being referred to us through a current member, the current member will receive 10% of the new member's fee off their next renewal invoice.

*So for example...*

If you recommend a company who joins us at the rate of £1750.00, you will get a £175.00 discount off your renewal.

The more companies you refer, the bigger the discount you receive, up to the point where your renewal becomes free-of-charge.

All you need to do is ensure that the referred company mentions you on their membership application form to qualify as discounts will not be applied retrospectively.

### THE SCHEME IN ACTION

Member company, Teledyne CML Composites referred Multi-Ply Components in late 2020.

John Toner, Vice President & General Manager, Teledyne Aerospace and Defence Electronics UK and General Manager of Teledyne CML Composites said:

“In a highly competitive global market, UK composites manufacturers need to use every resource at their disposal to be successful. Composites UK is one such resource.

“As a member of Composites UK for many years, Teledyne CML Composites has benefited greatly from this resource so when speaking to composites manufacturers in the UK, we often suggest they consider membership. We are pleased to hear that Multi-Ply Components have become members of Composites UK and make the most of the benefits this will bring”.

**MULTI-PLY**
