

## UK Flowtechnik

Distributors of specialist pumps, magnetic couplings, flowmeters & instrumentation designed to work with resins & composite materials.

### About UK Flowtechnik:

UK Flowtechnik is an established distributor of specialist pumps, magnetic couplings, flowmeters and instrumentation designed to work with resins and composite materials. It offers pumping and metering solutions for a wide range of viscosity, pressure and accuracy requirements. Fitted to OEM machines or for use in production, its range of products are well established and specified widely in many diverse challenging applications.

### Why they became Composites UK members:

Thom Shannon, Business Development Manager at UK Flowtechnik said: "We became Composites UK members to provide industry synergy with our existing customer and product base, as well as for the opportunity to broadcast our abilities through the Association and reach further potential customers.

"We are looking forward to utilising our membership to assist equipment OEMs build quality machines by supplying high-end products technical know how and support in their field."

### Ideal partners or clients:

"Our customer base is companies looking to monitor and deliver composite products in areas such as automotive, aerospace, subsea oil & gas, chemical, Atex fuel oil and gases in industrial processes. They can look to UK Flowtechnik for specialist technical support in the many applications it has added value to over the years."

### What makes them different:

"Thom added: "Our technical knowledge at a product and application level around pumping and metering of viscous products is renowned within the industry. Our fast reaction to customer demands is something we have strived to keep at a high level and is paramount in our business ethic."

## UK Flowtechnik

### For a Wide Range of Applications

Oil/Grease

Water

Air/Gas

Fuel/Fuel Oil

Chemicals

Paint/Ink

Adhesives/  
Coatings/Wax

Hygienic/ Food  
and Bev / Pharma

Hazardous / ATEX/  
IS / Flameproof

### In Demanding Industries...

Mobile/Industrial Hydraulics

Energy

Oil & Gas/ Offshore

Water & Waste/Environmental

Automotive/  
Aerospace

Process/Chemical Engineering

Plastic/  
Composite

Pharmaceutical/Food
