

2019

Environmental/Sustainability Award | **Winner: Gurit**

Bio-composite panel solution

Overview

The use of advance composites brings many light-weighting benefits to structure to enable energy savings for transportation applications and energy efficiencies in renewable power generation.

Over the last year, Gurit has increased its focus to bring further environmental benefits. New, industry leading product lines have been introduced, utilising safer and lower toxicity chemistry, a new certified bio-based resin system has been developed which offers both high performance and reduced reliance on petrochemicals and in combination with Gurit's sustainable core materials and natural reinforcements has resulted in the creation of a bio-composite panel solution.

Paul Spencer from Gurit (left) collects the award from Les Booker from Minden Dust Extraction Systems (right).

"Gurit is excited to have won this award to celebrate the development of a range of products to construct a high performance bio-based composite panel solution to allow composites to continue to play an important role in maintaining a sustainable future."

Paul Spencer
Product Development Manager
Gurit (UK) Ltd

The Composites UK Industry Awards are presented at the black-tie dinner which is aligned with the Composites Engineering Show in Birmingham.

Keep an eye out for our annual nomination process every May for your chance to apply.
