

SUSTAINABILITY AWARD: CIRCULARITY

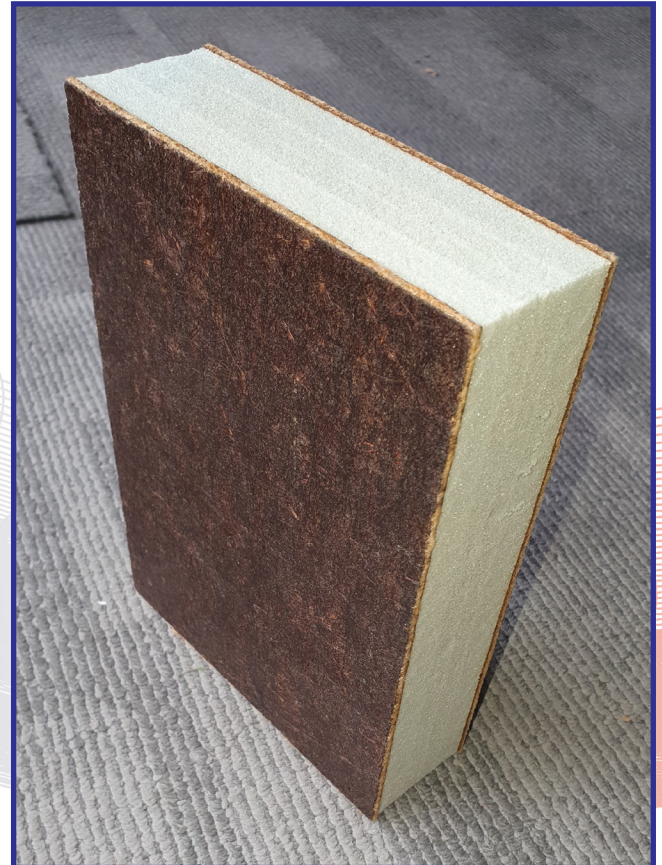

SHORTLISTED: Qube Buildings

Qube Buildings™ is at the forefront of sustainable construction, pushing the boundaries with their groundbreaking Bio-SIP™ system.

This innovative building solution combines advanced technology with the aspiration to redefine the way we perceive and achieve sustainable, affordable, and passive housing. The Bio-SIP™ system, inspired by Structural Insulated Panels, features a core from recycled plastic and a bio-based exterior skin, making it an eco-conscious choice for environmentally responsible construction.

As a pioneer in the field, Qube Buildings™ remains dedicated to advancing the construction industry toward a greener and more sustainable future. Their commitment to sustainability and their use of cutting-edge materials make them a catalyst for change in the realm of construction, aiming to create eco-friendly, energy-efficient structures that are accessible and affordable for all.
