

INNOVATION IN COMPOSITE DESIGN AWARD

SHORTLISTED: Chemical Processing Services Ltd

The FUROX Bio-Benzoxazines are a new patented technology that offer themselves as matrix systems in high performance composite parts.

This new chemistry is continuously evolving and forming the basis of components that reduce petrochemical reliance and offer longevity in the most demanding applications.

These products form part of a range of the new CPS Patented IP that are derived from sustainable feedstocks and help with the drive towards a circular economy.
