

NEW TO COMPOSITES?

The UK composites sector is estimated to be worth £10.72bn, this is only set to rise. Currently there are around 1,200 companies working across the supply chain in the UK in exciting industries like aerospace, automotive, construction, marine, motorsport, renewable energy and more - all key markets for composites.

You may be asking however, what is a composite?

FREE DOWNLOAD

Available free-of-charge from Composites UK is a downloadable 11-page booklet written by Composites UK, the National Composites Centre and the Composites Leadership Forum.

It covers:

- What is a composite?
- Growth in the composites industry
- Weight reduction properties
- Durability and maintenance properties
- Added functionality
- Design freedom
- The history of composites
- Materials background and what makes a composite
- Manufacturing processes
- Design, data and automation
- Fire retardancy
- Life cycle analysis and recycling
- Repair of composites
