

OUTSTANDING CONTRIBUTION TO THE COMPOSITES INDUSTRY AWARD

WINNER: Mona Jesri

Mona is a trailblazer in the biocomposite sector, with a significant impact in the UK and globally. While pursuing her first master's degree, she founded a business in the Middle East focused on agricultural waste and natural fibres. Leveraging this experience, she co-founded SM8RT in the UK, a company at the forefront of sustainable materials and renewable technologies.

Specialising in natural fibre composites, Mona is revolutionising the UK's supply chain by bridging gaps between the agricultural sector, textile industry, and end-users. Her cross-sectoral expertise ensures a resilient supply chain that can adapt to future market needs.

A passionate STEM ambassador, Mona is committed to inspiring the next generation of engineers through her own journey of innovation and disruption. Her dedication to sustainability is evident in her leadership of projects at SM8RT. Mona's early determination has evolved into transformative contributions to her industry.
