

SUSTAINABILITY AWARD: NET-ZERO INITIATIVE

SHORTLISTED: CODEM Composites Ltd

CODEM's innovative methods in the CALLUM SKYE project led to CO²e savings exceeding 10,000 kg, establishing a new standard for sustainable manufacturing.

This achievement showcases CODEM's ability to provide eco-friendly, high-quality solutions with significant environmental and financial benefits.

The approach includes Direct-to-Part Manufacturing, which reduces waste, the use of Sustainable Tooling Materials for greater efficiency, Flax Fibre Bodywork for lightweight, renewable components, and Bio-Based Resins.

These advancements reflect CODEM's dedication to sustainability and its leadership in driving greener manufacturing practices forward.
